

GEAR LIST reNEW Adventure 2015

We look forward to meeting you. We have designed this equipment checklist to help you decide what to bring on your course. **Please take the time to read the descriptions carefully. Please think small and light - every gram counts.** The checklist on the far left side of the pages is designed to help you organize what to bring with you.

We encourage you to use gear that you already own (even if it is an item that we have said we will provide you.) Bring a range of items to choose from and your guides can help you decide which gear to select—that is what your guides are there for! (For example: If you own several upper body layers but cannot decide whether two mid-weight tops or one mid-weight top plus an expedition weight fleece is the better choice, then bring them all and your guides will guide you towards a good decision). **Note that your guides will inspect any gear you may have brought with you to determine it's suitability for your adventure.** If an item is not appropriate, you can leave it with your baggage in our storage.

To ensure that your group is prepared, your guides will take you step-by-step through the packing process in a “packing station” before entering the backcountry. We look forward to seeing you! In the meantime, we encourage you to initiate a physical conditioning program.

If you have any questions or if you would like more information regarding any of the items in the equipment list, please contact the ITW team at:
